Activity 14: Learning Styles

FOR THE TEACHER

Introduction

The purpose of this activity is to help students:

- Identify and analyze their preferred learning styles
- Understand the relationship between learning styles and academic success
- Understand the relationship between learning styles and career choices

Setting the Stage

Classroom discussion can begin with students describing their ideal studying or learning environments. Ask them to draw on their own study habits and preferences. The variety of answers will help students realize that people have different ways of learning and retaining information.

As a class, brainstorm reasons why it is important to understand one’s learning style. Learning styles impact not only school performance, but also our success in the workplace and in the world. While learning styles don’t reflect our actual abilities, they do influence the way in which we learn to perform work and social tasks, manage our time and resources, and how we interact with co-workers and family members who have different learning styles.

Some students may discover that they have more than one preferred learning style. In this case, students can choose from the traits, tips, and strategies associated with each of their preferred learning styles in order to complete the activity. Be sure to emphasize to all students that there is no right or wrong learning style.

After completing the worksheet, ask students—as a class or in small groups—to discuss their individual learning styles and compare them with other students’ preferred learning styles. Students should be able to describe the three key learning style preferences (visual, auditory, and tactile), and identify learning strategies and conditions that complement each style. This will help students to consolidate their learning. Remind students that they all have the capacity to learn in different ways.
